SEATTLE HAS A FIRE

(Four O'Clock Edition.)
Seattle, Wash., May 7.—The Arlington dock was practically destroyed by fire at 3:30 this morning, with a loss of \$300,000. An explosion of cartridges is supposed to have been the cause. The whole water front was threatened, but the flames were controlled in an hour. The army transport Sherman, lying

alongside, was saved by the excellent discipline of the crew. The vessel's cargo, stored on the dock for shipment to the Orient, was a complete loss.

ALREADY A HUNDRED FEET DEEP

Sacramento, Cal., May 7.—A special from Woodland to the Sacramento Union says:

The threat of flood in the Capay valley, resulting from the slide of earth that has fallen from the mountain side and dammed the waters of Cache creek is growing increasingly serious. It may be assumed that the slide in question was in some way the result of the recent earthquake, and it is now found to be 1000 feet wide, and to close completely the water course. Ever since the occurrence the waters have been steadily piling up behind it, and it was found by measurements taken this morning that a depth of 100 feet had been reached.

If it had been taken at an earlier stage the dam might have been blown up with dynamite, and the waters released without danger to any locality, but it is now too late to do this, as it would but precipitate the flood that is feared. The dam is of soft earth and debris, and there is some hope that it may absorb the water or cut out gradually, and the water pass in harmless quantities. Should it give way to the pressure the results would be very serious, and a large area of country would be flooded.

The towns in immediate danger are Capay, with a population of something under 400; Rumsey, with a population of 200, and Guinda, with a population of 350, all in Capay valley. The inhabitants of these towns are so far impressed with the possible danger that confronts them that they have abandoned their houses and removed their belongings, even to the contents of the stores, to the hillsides, where they are camping with their families.

The railway company is taking precautions for the protection of the line, and for prompt repair of any damages that may be caused, and watchers have been placed upon all the Yolo bridges to keep the bridges clear of brush and trees if a break occurs.

Sacramento, May 7. The dam formed by the landslide on Cache creek is gradually giving away. The first break was last night. There is no danger of a flood unless the dam should reform.

ANOTHER BIG FIRE IN 'FRISCO

San Francisco, May 7.—A fire which necessitated the calling out of 200 blue jackets and marines, who were stationed along the water front, and which for a time threatened the saved portion of the city front, extending from Union street to Second and Brannan, occurred late last night, due to spontaneous combustion in a large brick building on Filbert and Sansome streets, occupied by the Gibraltar warehouse, and having its origin among a thousand rolls of wall paper. The fire raged fiercely for a couple of hours. Great headways were gained by the fire, and in the strong northwest wind spread to the ruins and adjacent frame buildings. All along the water front ships moored at the docks lay in the path of the fire, and destruction seemed imminent. Among the vessels threatened were the Pacific Coast Steamship Company's steamers Curacao and Umattilla; the Pacific Mail steamer City of Para; the Japanese liner Nippon Maru; the Oceanic steamer Sonoma; U. S. war vessels Chicago, Boston, Burnside, Princeton.

Will Not Aid 'Frisco.
Washington, May 7.—The senate committee on finance unanimously reported adversely to Senator Newland's proposition providing for the creation of a joint commission to consider measures to extend financial aid to 'Frisco, through guaranteeing improvement bonds. "The proposition is without the legitimate province of congressional action, and is inexpedient." The President signed the bill providing for a delegate to congress from Alaska.

The complaint states that on April 9th Miss Harriman was walking on Tower avenue, when she cut her foot on a spike that protruded through the planks and blood poisoning set in, causing the loss of her leg at the knee.

The complaint was served on Mayor Gilchrist, and will be handled for the city by Judge P. T. Merritt. Not much is known about Miss Harriman, and so far the city is in the dark as to who she is. At the time of the accident nobody was informed of it.

General Corbin's Plans.
Washington, May 7.—The lieutenant general of the army, who has been in Washington for several days, has left for Wilmington, O., where he and Mrs. Corbin are now visiting the general's daughter. After a brief stop at Cincinnati they expect to go to French Lick Springs, Ind., where they will spend several weeks before going to St. Louis, where General Corbin will assume command of the northern division. General Corbin's aids, Lieut. Colonels J. A. Moss and W. E. Horton, who are really captains in the army and have become lieutenant colonels by virtue of the appointment of General Corbin to the grade of lieutenant general, have already gone to St. Louis where they will await the arrival of their chief.

General Corbin feels the need of the relief and rest which will be afforded by a stay of several weeks at the Indiana resort. He does not plan to remain much in St. Louis this summer, as the season in that city is not very comfortable. He will attend the graduation exercises at West Point in June and early in June will start on his last official inspection trip, that of his division. His observations will be contained in a report to be made just before he goes on the retired list in September. After that General Corbin will come back to Washington and take up his residence at Cherry Chase, where he is having a fine house built.

After Standard Oil.
(Four O'Clock Edition.)
Columbus, Ohio, May 7.—Attorney-General Ellis has joined with Roosevelt in the fight against the Standard Oil, and prosecutions based on the unlawful methods used in Ohio by the Standard to crush out competition are to follow. Ellis today is consulting with Roosevelt. Special counsel's report shows that the Standard operates in the state under five different names, which the report calls "pirating," in using fictitious names by which to destroy competition by underselling and then to prevent the real independents from doing business.

San Francisco.
A groan of earth in labor-pain,
Her ancient agony and strain;
A tremor on the granite floors—
A heave of seas, a wrench of shores,
A crash of walls, a moan of lips,
A terror on the towers and ships;
Blind streets where men and ghosts go by;
Whirled smoke mushrooming on the sky;
Roofs, turrets, domes, with one acclaim
Turned softly to a bloom of flame—
Gone with their dreams of joy and power
Is this dread splendor of an hour!
